

Socati C2: (CHERRY WINE X CHERRY WINE)

This feminized varietal originates from Cherry Wine that was back crossed with a high performing Cherry Wine phenotype to ensure total THC levels remain compliant through maturity.

A solid yield with very good overall CBD potency.

Cherry cultivars have been held in high regard for their excellent terpene profile. This cultivar expresses fruity overtones with a hint of musk. Over the years this has been one of our most popular cultivars for flavor in a smokable market.

The plant grows 5 to 6 feet tall with strong apical dominance and an abundance of secondary branches.

The plant exhibits good disease and mold resistance.

Socati C2 does especially well in high sun environments and is an early finisher.
